Mountain Weather Forecast

Brecon Beacons National Park

Forecast valid from 00:00 on Saturday 28 Nov 2020 until 23:59 on Sunday 29 Nov 2020

Forecast Issued on Friday 27 Nov 2020 at 15:14

Confidence: Cloud cover and extent of poor visibility across the hills holds the most uncertainty in the forecast with some marked differences possible. High for wind strengths and temperatures.

Headline for Saturday 28 Nov 2020: Dull and foggy. Some brightness across the Black Mountain.

Forecast for Saturday 28 Nov 2020

Weather: Rain will push northwards through the early hours along with thickening and descending cloud. The day will be dominated by extensive low cloud across all areas with a few spells of rain or drizzle, mainly through morning. A few cloud breaks are possible across the Black Mountain. Little change through evening.

Chance of cloud free mountain/hill tops above 600m: 20% across the Black Mountain, otherwise virtually no chance with cloud extensive above 300-500m.

Visibility: Mist or fog will dominate above modest elevations but the far west may see some improvement, this perhaps marked.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Poor visibility hampering navigation for much, if not all, of the day. Best of the shelter across the more sheltered west.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
15:00 on Fri 27 Nov 2020	0.2mm	0.4mm	7.2mm

Forecast for Sunday 29 Nov 2020

Weather: Another mainly overcast and rather dull day with persistent hill fog across most areas, as well as in the valleys at times. However, some bright or sunny spells are likely across the west but these likely limited in extent and duration.

Maximum wind: 5-10mph, variable in direction.

Chance of cloud free mountain/hill tops above 600m: 10% with cloud rather extensive and persistent above 300-500m.

Visibility: Generally no more than a kilometre or two above modest elevations. Much improved at low levels and perhaps across western hills.

Temperature: **Valleys:** 6 to 8 Celsius.
At 600m: 3 or 4 Celsius.
Freezing level: Above summits.
